JAMES DANIEL BOLUWATIFE

SOFTWARE DEVELOPER

No 1, Mega Street, Ilaro, Ogun State, Nigeria | niel2264@gmail.com | +2347040357987 | www.niel-dev.vercel.app

PROFESSIONAL SUMMARY

Backend-focused software developer with 3+ years of experience and 2+ years of professional working experience in Laravel and Node.js, passionate about building scalable APIs, full-stack applications, and database-driven solutions. I take pride in delivering efficient, high-quality software while bringing in modern frontend touches with React.js and Tailwind CSS.

SKILLS SUMMARY

Languages: PHP, JavaScript, TypeScript, SQL

Frameworks: Laravel, Express.js, React.js, Next.js, Livewire, Tailwindcss, Bootstrapcss

Tools: Git, GitHub, GitHub Actions, MySQL, VPS & cPanel, Postman, Microsoft Office

Technical Skills: Full-Stack Website Development, Database Design & Management, API Development & Integration (REST, JWT, Laravel Sanctum), Clean Code & Best Practices, Object-Oriented Design (OOD), SOLID Principles, CI/CD Pipelines, Basic Server Setup & Deployment

Soft Skills: Team collaboration, Problem solving, Critical thinking, Attention to detail, Time management, Adaptability, Clear communication

PROFESSIONAL EXPERIENCE

Backend Developer   **April 2025 - December 2025**

Zealarax Technology   *Lagos State, Nigeria*

- Led the development of scalable backend systems for enterprise applications.
- Worked on API development for a SaaS-based POS system and a content management system for informational websites using Expressjs.
- Conducted code reviews to maintain project standards
- Designed and integrated a UI with the APIs using React.js to create user-friendly interfaces.
- Worked closely with clients to understand requirements and deliver tailored solutions.
- Streamlined deployment processes using GitHub Actions to implement CI/CD pipelines, ensuring faster, automated, and reliable release.

Junior Web Developer   **July 2025 - August 2025**

GN128 Solutions   *Lagos State, Nigeria*

- Single-handedly developed fullstack solutions for the company.
- Built and deployed complete web applications from scratch.
- Handled both frontend and backend logic using modern frameworks.
- Integrated databases and APIs for smooth functionality.
- Ensured applications were scalable, maintainable, and performant.
- Worked closely with clients to gather requirements and deliver end-to-end solutions.

Backend Development Intern   **November 2024 - March 2025**

Zealarax Technology   *Lagos State, Nigeria*

- Contributed largely to an ongoing project: a fully functional Hospital Management System to streamline day-to-day hospital activities using Laravel.
- Focused on API development for seamless data exchange between hospital departments.
- Collaborated with the team to ensure scalability and reliability of backend services.

Software Development Intern   **April 2025 - May 2025**

Prodigy School Suite   *Lagos State, Nigeria*

- Contributed to developing school management software using PHP.
- Developed a system integrated with the INFOBIP API to streamline WhatsApp messaging to students' parents.
- Automated tools using jQuery, PHP, and SQL to enhance operational efficiency.
- Assisted in integrating third-party services to enhance system capabilities.

Backend Development Intern   **March, 2025**

Ule Homes   *Lagos State, Nigeria*

- Developed and maintained backend solutions using TypeScript and raw SQL.
- Collaborated with the team to optimize database queries and improve application performance.
- Created APIs for internal tools to streamline business processes.
- Assisted in debugging and resolving backend-related issues to ensure seamless operation.

Software Developent Trainee   **March 2023 - November 2024**

Kudastech   *Ogun State, Nigeria*

- Learned and applied web development technologies, including HTML, CSS, JavaScript, and Laravel.
- Built a full-stack e-commerce platform (womarkbuy.com) and a blogging platform (blog.womarkbuy.com).
- Developed skills in system design, clean code practices, and team collaboration.
- Gained proficiency in database management using MySQL.

PROJECTS

Hospital Management System | [LINK](#)   **November 202**

Backend Developer

- Developed the backend for a comprehensive hospital management system using Laravel and MySQL, with Vue.js on the frontend.
- Implemented secure authentication, role-based access control, and staff/patient management workflows.
- Streamlined medical operations including patient records, appointments, medical histories, staff schedules, and billing.
- Ensured real-time insights, reduced manual errors, and improved overall administrative efficiency.

Pharmacy Management System | [LINK](#)   **Novermber 2025**

Backend Developer

- Built a role-based pharmacy management backend for admins, suppliers, and customers using Node.js, Express.js, Javascript, MySQL, REST APIs, and Authentication & Role-Based Access Control.
- Implemented inventory, sales, and supplier workflows to reduce stock shortages and enforce accountability.

PPP Investment Management Portal | {Link available on request}   **October 2025**

Fullstack Developer

- Architected a Public-Private Partnership (PPP) investment platform with Laravel, React.js, MySQL, Tailwind CSS, and REST APIs to list available projects and manage investor participation.
- Implemented multi-stage investor qualification and tracking across the full investment lifecycle to ensure compliance and eligibility.
- Built five role-based dashboards (Investor, Analyst, Manager, Admin, CEO) with strict access control and workflow enforcement.
- Added audit trails and system health monitoring to ensure transparency, accountability, and platform reliability.

POS Inventory System | [LINK](#)   **February 2025**

Backend Developer

- Architected a SaaS POS and inventory backend supporting multi-business and multi-store operations with React.js, Express.js, MySQL, Tailwind CSS, REST APIs, and Authentication & Multi-business Logic.
- Implemented secure authentication, transaction logging, and inventory control to eliminate manual errors and improve operational visibility.

Nirvana Initiative NGO Website | [LINK](#)   **April 2025**

Backend Developer

- Developed backend services powering content management and secure online donations using Next.js, TypeScript, Express.js, Tailwind CSS, and Paystack Payment Gateway.
- Designed scalable APIs to support NGO programs, transparency, and long-term platform growth.

Nigeria Central – Europe Chamber of Commerce | [LINK](#)   **May 2025**

Fullstack Developer

- Delivered end-to-end features for a corporate trade platform connecting Nigerian and European institutions using Nextjs, Express.js, MySQL, Tailwind CSS, and REST APIs.
- Designed REST APIs and database models to support trade content and cross-border partnerships.

Regional Trade Institute | [LINK](#)   **June 2025**

Backend Developer

- Implemented backend logic for course listings, cart management, and online payments using React.js, Express.js, MySQL, Tailwind CSS, and Paystack Payment Integration.
- Structured the system to support future academic and trade expansions.

CMS Dashboard | {[Link Available on Request](#)}   **April 2025**

Backend Developer

- Engineered a centralized CMS backend for multiple production websites using React.js, Express.js, MySQL, Tailwind CSS, and Role-Based Access Control.
- Enabled admins to safely update content without developer involvement.

Assessment & Recruitment Portal | [LINK](#)   **July 2025**

Fullstack Developer

- Built an internal recruitment assessment system supporting MCQ, objective, true/false, and theory questions using Laravel, Blade, Tailwind CSS, and Vanilla JavaScript.
- Implemented role-based tests, individual scheduling, and strict time-controlled access to ensure fair assessments.

Shoes E-Commerce Platform | [LINK](#)   **January 2024**

Fullstack Developer

- Developed a full e-commerce platform with product management, cart, checkout, and user accounts using Laravel, Livewire, MySQL, Bootstrap CSS, and E-commerce Business Logic.
- Implemented core business logic required to run a modern online store.

Blog Platform with RBAC | [LINK](#)   **January 2025**

Fullstack Developer

- Built a role-based publishing platform with controlled workflows for admins, authors, and editors using Laravel, Livewire, MySQL, Bootstrap CSS, and Role-Based Access Control.
- Enforced content quality through permission-based publishing and approvals.

EDUCATION

Federal Polytechnic Ilaro, Ilaro, Ogun State.   **October 2022 - 2024**

- *National Diploma in Computer Science*
